DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of the restriction requirement in the reply filed on August 16, 2004 is acknowledged. The traversal is on the ground(s) that the restriction requirement is not mandatory, but discretionary. Additionally, applicants assert that no undue burden is placed upon the examiner to search all pending claims since the claims were originally presented and searched by the examiner. This is not found persuasive because while the claims have been previously examined, the claims of the non-elected invention are best examined in the art area it would be classified. Additionally, the burden of search is based upon not only time constraints, but also upon the required search area. While the examiner has examined the previously presented claims, the claims as amended by the amendment filed with the request for continued examination filed April 19, 2004 are different and do not require the same search. Whereas the scope of the claims have changed, the restriction requirement is not only permissible, but is also proper.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 14-18 and 22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on August 16, 2004.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the laminar member of the closure in addition to the annular sealing ring must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Art Unit: 3727

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

4. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: "the rigid cap further having a laminar member" from which the annular skirt depends. The specification sets forth the membrane 11 can be a laminate (page 8, lines 25-27) and the annular ring 24 is of a resiliently deformable material (page 10, lines 9-14). No other structure is disclosed as a laminar member. Additionally, the specification sets forth the skirt as depending from a circular disc of the rigid cap.

Claim Objections

Art Unit: 3727

5. Claim 6 is objected to because of the following informalities: the language of claims 6 is awkward. It would appear "extending" should read -- extends --. Appropriate correction is required.

Claim Rejections - 35 USC § 112

- 6. Claims 1,3,4,6,8-11, and 13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The cap is disclosed as being rigid with an annular skirt and a deformable annular sealing ring. There is no disclosure for the cap having a laminar member from which the skirt depends.
- 7. Claims 1,3,4,6,8-11, and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, the claims are rejected for the following reasons:

The structure of the claims is not clearly set forth.

- Is the seal a structural element or merely the engagement between the membrane and the open end of the container?
- The recitation of the container has been removed from the preamble, thus indicating only the lid is intended to be the claimed invention. However, the body of claim 1 recites a positive relationship between the container and the membrane. Is the container part of the claimed invention of a "container assembly"? Wherein the structure of the container is positively recited, the

Art Unit: 3727

claims are considered to be drawn to the combination of the closure and container as set forth in the preamble.

 What structure of the rigid cap with the resiliently deformable member represents the laminar member?

Dependent claims not specifically mentioned are rejected as depending from rejected base claims since they inherently contain the same deficiencies therein.

Claim Rejections - 35 USC § 103

8. In view of the rejections under 35 USC 112, 2nd paragraph above, no art rejection is being made at this time. The claimed invention is not considered to avoid the prior art of record, but a rejection based upon the prior art is not appropriate at this time because of the above noted rejections.

Conclusion

- 9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Various prior art closures teaching features similar to those disclosed and/or claimed are cited for their disclosures.
- 10. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (703) 872-9306. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.
- 11. It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely

Art Unit: 3727

asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:

The U		correspondence for Application Serial No Office via fax number (703) 872-9306 on the	
	Typed or printed name of	of person signing this certificate	
	Signature_		
	Date		

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robin Hylton whose telephone number is (571) 272-4540. The examiner works a part-time schedule and can normally be reached on Monday - Friday from 9:00 a.m. to 1:00 p.m. (Eastern time).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lee Young, can be reached on (571) 272-4549.

If in receiving this Office Action it is apparent to applicant that certain documents are missing, e.g., copies of references cited, form PTO-1449, form PTO-892, etc., requests for copies of such papers should be directed to Errica Miller at (571) 272-4370.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-1148 or may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
